PROFILE

Visionary data professional with 8+ years of experience driving end-to-end data delivery and enterprise transformation across Australia’s leading financial institutions. Proven track record in building high-performing teams, delivering governed and integrated data solutions, engineering robust data pipelines, and architecting scalable data platforms. Expert in implementing data governance frameworks, ensuring data quality, and managing data risks throughout the data lifecycle. Skilled in establishing cross-functional partnerships with C-suite leadership and leading organisational change that enables scalable, data-driven decision-making and the integration of advanced AI/analytics capabilities.

Core Leadership Capabilities: Data Strategy & Development | Team Leadership & Mentorship | Executive Stakeholder Management | Data Transformation | Risk Management & Regulatory Compliance | Advanced Analytics & Visualisation | End-to-End Data Delivery

Transformation Impact: Currently leading enterprise data modernisation programs replacing legacy systems with data mesh architectures. Delivered \$200M+ cost optimisation, built 10+ governed data products, and established data governance frameworks reducing operational risk by 30% across multi-billion-dollar portfolios.

EMPLOYMENT HISTORY

Macquarie Group, Sydney

May 2022 to present

Macquarie is a global financial services group operating in 34 markets in asset management, retail and business banking, wealth management, leasing and asset financing, market access, commodity trading, renewables development, specialist advisory, capital raising and principal investment.

SENIOR MANAGER, Data Lead

- Built and scaled a cross-functional data team of 5 data professionals within the Credit Risk division, delivering strategic data solutions that enhanced regulatory compliance, strengthened risk management, and enabled data-driven decision-making across the enterprise.
- Led the data stream within a large-scale, multi-year transformation program, architecting a modern, domain-driven data mesh solution to replace a 20-year-old legacy platform, ensuring 100% data lineage and seamless continuity.
- Developed a Credit Risk Data Strategy aligned with enterprise frameworks, resulting in improved governance maturity and trusted data products now used across the organisation.
- Achieved \$700,000 in annual cost savings by replacing vendor data feeds with zero disruption to downstream capital and regulatory reporting, while leading the design of a modern data model and overseeing reconciliation efforts.
- Developed 10+ risk-aligned, governed data products and built a new Credit Risk Data Warehouse, replacing 20+ tactical ETL pipelines, improving reporting quality, and reducing production incidents by 50%.
- Implemented data quality frameworks with pipeline-level controls (load assurance, checksum validation, automated alerting) and post-ingestion quality rules, reducing critical data issues by 30%.
- Built strategic partnerships with C-suite stakeholders, leading governance forums to align business and tech teams on data requirements, reducing operational and data risks, and improving data utilisation.
- Championed modern data architecture (data mesh, domain-driven design), in collaboration with enterprise architects to deliver scalable solutions that reduced development time by 50% and improved data accessibility.
- Implemented data privacy and governance frameworks, including PII protocols, row-level security, automated retention policies, and encryption, ensuring full privacy compliance alongside Business Operational Risk Management.
- Designed and implemented data-sharing agreements across enterprise systems, establishing contractual frameworks with quality rules, access controls, and operating models to ensure secure and compliant data exchange.
- Leveraged AI to reverse-engineer and document legacy processes and code, conducting impact assessments for system updates and benchmarking GitHub Copilot against Claude Code to ensure consistent and reliable output.
- Proof of Concepts (PoCs):
 - Developed a Retrieval-Augmented Generation (RAG) use case for a policy chatbot, converting PDF documents to markdown, using OpenAI API for text embedding, storing embeddings in a vector database, and building a chatbot for Q&A against policy documents.
 - Built an AI-powered chatbot using OpenAI’s function-calling capabilities to query databases and provide real-time insights, reducing DataOps efforts by automating responses to complex queries.

Commonwealth Bank of Australia (CBA), Sydney

Apr 2018 to Apr 2022

CBA is a leading provider of integrated financial services, including retail, premium, business and institutional banking, funds management, superannuation, insurance, investment and share broking products and services. CBA employs over 49,000 staff with revenues of \$28Bn.

MANAGER ANALYTICS & INSIGHTS, 2019 to 2022

- Led strategic data transformation and analytics capability development for Group Procurement, establishing enterprise data strategy and delivering organisation-wide cost optimisation through data-driven insights across ~\$9B spending portfolio.
- Served as strategic advisor to Chief Procurement Officer and C-suite leadership, facilitating discovery sessions and translating business requirements into scalable data solutions that drive productivity and regulatory compliance.
- Delivered transformational cost optimisation enabling strategic vendor management and contract negotiation improvements across the organisation through advanced analytics and market intelligence.
- Built and mentored high-performing analytics team, establishing best-in-class reporting capabilities and knowledge frameworks that support board-level decision-making and regulatory compliance.
- Championed modernisation of core analytics platforms including Hadoop, Alteryx, Python, Tableau, PowerBI, and Teradata, introducing machine learning models to replace rule-based categorisation systems.
- Established centralised data repositories and automated reporting solutions, reducing reporting timeframes from weeks to hours while improving accuracy and consistency across business units.
- Created aggregated and enriched datasets enabling faster ad hoc analysis and delivered comprehensive suite of self-service dashboards allowing teams to extract data into standard templates within minutes.
- Synthesised qualitative and quantitative data from various sources to identify group spending patterns and provide strategic insights that successfully mitigated costs and optimised vendor relationships.

Commonwealth Bank of Australia (CBA), Sydney

SENIOR TECHNICAL BUSINESS ANALYST | ANALYTICS & INSIGHTS, 2018 to 2019

- Served as strategic business partner within Chief Data Office, driving data strategy advancement and leading cross-functional initiatives to enhance enterprise data capabilities across multiple business streams.
- Acted as trusted advisor to business leaders, identifying data strategy gaps and delivering innovative solutions that aligned operational needs with enterprise data architecture roadmaps.
- Served as primary interface between business and technology teams, translating complex requirements and managing critical project delivery for enterprise-scale data initiatives.
- Technical specialist on CAN360 (\$100M transformation program), leveraging Hadoop and machine learning capabilities to deliver enhanced customer decisioning and retail banking insights.
- Collaborated with Financial Crime department to architect first-of-its-kind Financial Crime Data Mart and Analytics solution, establishing new strategic capabilities for the organisation.
- Led big data platform issue resolution and enhancement initiatives, working with data engineers to create scalable data pipelines and automated solutions across enterprise platforms including Hadoop, Spark, Teradata, Alteryx, Tableau, and SAS.
- Investigated, identified, and resolved critical issues within big data platforms, ensuring robust foundations for enterprise analytics and decision-making processes.

Equifax Australia, Sydney

Jul 2016 to Mar 2018

Equifax is a member of Standard & Poor's (S&P) 500® Index and is the leading provider of credit information and analysis in Australia and New Zealand. Equifax operates or has investments in 24 countries with over 800 staff.

INSIGHTS ANALYST

- Delivered strategic insights and analytics solutions for Australia's leading credit information provider, partnering with Consumer and Commercial Credit teams to define insights frameworks utilised by major financial institutions including CBA, Westpac, and St. George.
 - Championed data-driven opportunities and proof-of-concept development, presenting strategic recommendations to senior management on leveraging Equifax's analytics capabilities for competitive advantage in the financial services market.
 - Designed and delivered self-service dashboard capabilities that transformed insights delivery from 2-week manual processes to real-time access, enabling Sales and Marketing teams to generate reports within minutes.
 - Produced comprehensive analysis on FinTech market growth and emerging trends, providing strategic intelligence that informed business development and competitive positioning decisions.
 - Established data quality assessment frameworks and partnered with business stakeholders to develop quality metrics, ensuring robust foundations for enterprise analytics and decision-making.
 - Leveraged Equifax Hadoop ecosystem and advanced analytics tools including SQL, Hive QL, Impala, R/Python,
- 

- Tableau, Spotfire, and d3.js to process large-scale data and create interactive data visualisations.
- Captured business needs and advocated on behalf of business stakeholders in interactions with IT, establishing foundation skills in cross-functional collaboration and technical translation.

Previous positions held:

Project Coordinator | Techflare Solutions, 2016

- Managed end-to-end client projects and stakeholder relationships while developing foundational data analytics capabilities using SQL and Power BI

Service Desk Analyst | Techflare Solutions, 2015

- Delivered technical support and enterprise systems administration, building strong client service and problem-solving foundation

Application Support Officer | Payment Express International, 2012 to 2014

- Led technical development and system migration projects for payment infrastructure, building expertise in database development and enterprise system implementations

CORE COMPETENCIES

Strategic Leadership: Data Strategy Development • Team Building & Leadership • Executive Stakeholder Management • Digital Transformation • Change Management • Cross-Functional Collaboration • Business Value Delivery

Data & Analytics: Data Governance • Data Architecture • Machine Learning • Business Intelligence • Data Engineering • Data Modelling • Statistical Analysis • Predictive Analytics • Self-Service Analytics

Technical Platforms: Python • SQL • PL/SQL • R • Tableau • Power BI • Alteryx • Hadoop • Spark • Teradata • AWS • Databricks • Oracle • Microsoft SQL Server • ETL/ELT • Microsoft Copilot • OpenAI API • Claude Code

Domain Expertise: Financial Services • Risk Management • Credit Risk • Procurement Analytics • Vendor Management • Cost Optimisation • Data Quality & Auditing

Project & Program Management: Agile Methodologies • Transformation Programs • Data Migration • Legacy System Modernisation • Vendor Governance • Stakeholder Engagement

QUALIFICATIONS & EDUCATION

- Foundations of Data Science
Springboard, 2017
- Master of Information Technology in Data Analytics
University of Technology Sydney, 2015
- Bachelor of Computer Applications
Birla Institute of Technology, Mesra, Ranchi, 2012
